

# anseo secondary Biometric Edition

simplifying **attendance management**

## Secure Fingerprint Recognition

### AVOID "BUDDY PUNCHING"

For overworked administration staff who are frustrated with the management of student attendance, Anseo, the market leader in attendance management systems, will save up to 50% more time while increasing the accuracy of your records. Anseo Secondary Biometric Edition combines all the benefits of the base product with the additional security of fingerprint recognition.

Fingerprint recognition closes the loophole of swapping cards or id numbers (buddy punching) for one student to register on behalf of another.

Anseo Secondary Biometric Edition comes with two modes of operation; one mode requires student ID cards while the other mode allows the system to operate without ID cards.

### STUDENT IDENTIFICATION CARDS

Students register their attendance using an ID card and then they verify their identity with their fingerprint. This is the most efficient and reliable method for registering students.

### NO CARDS REQUIRED

Students register their attendance using a PIN number rather than an ID card. They then verify their identity with their fingerprint.

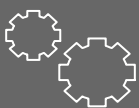

# flexible solutions for managing attendance

## Data Protection

Data protection issues have been raised about the storage of personal information such as fingerprints. Anseo Biometric Edition complies with all Data Protection issues.

- The system does not store fingerprint images but a digitally encrypted code. Only a part of the fingerprint is sampled and this is digitally encrypted. Therefore it cannot be used for any purpose outside the attendance system
- The school is required to inform parents of the use and purpose of such a system.
- Each parent has the option to opt out of having their child's fingerprint being recorded. The child's attendance can then be recorded with an ID card only.

## How Does it Work?

- Student scans their ID card or enters their ID Number.
- Student verifies their identity through fingerprint recognition.
- Track students if they leave school during school hours.

## Instant Reports

- Immediately print reports and monitor records of attendance, absence and punctuality.
- Early warning system for students who have issues with non attendance or punctuality.
- Parents can be notified immediately through text message.

## Customer Support

Iveteq prides itself on its after sales support and assistance to ensure that Anseo is successful in your school. Through remote support solutions the reliability and uptime of the system in your school will be uninterrupted.
